 AUTOMATED POOL COVER

 Pollet Pool Group

Aquadeck® Close... to be perfect!

A swimming pool represents comfort, relaxation and enjoyment. Every component contributes to that experience, and the cover plays an important role in this.

At Aquadeck®, we don't see the cover as a detail, but as an essential part of your swimming pool. It ensures safety, energy savings and a neat finish. The cover is both the perfect start and the ideal finish to a day spent in and around your pool.

An Aquadeck® is reliable, user-friendly and fits seamlessly into the overall picture of your garden. It's a smart choice that you'll enjoy for years to come.

Aquadeck® Close... to be perfect!

Aquadeck® Pool Cover Craftsmanship

At Aquadeck®, we have a passion and love for swimming pools and covers. Thanks to this ambition, we have been a leading manufacturer of automatic cover systems for over 25 years. Aquadeck® is based in Budel (the Netherlands). With care, craftsmanship and healthy ambition, we produce top-quality slatted covers in-house. Our engineers are always looking for the best and most beautiful materials, developing the smartest designs and using the safest components. Simply because only the best is good enough for us. Our accumulated knowledge and years of experience are our guiding principles. But innovation is never-ending and never finished. We believe that things can always be better, smarter or more beautiful. We are only satisfied when you are... and remain so!

Want to know more? Visit www.aquadeck.nl

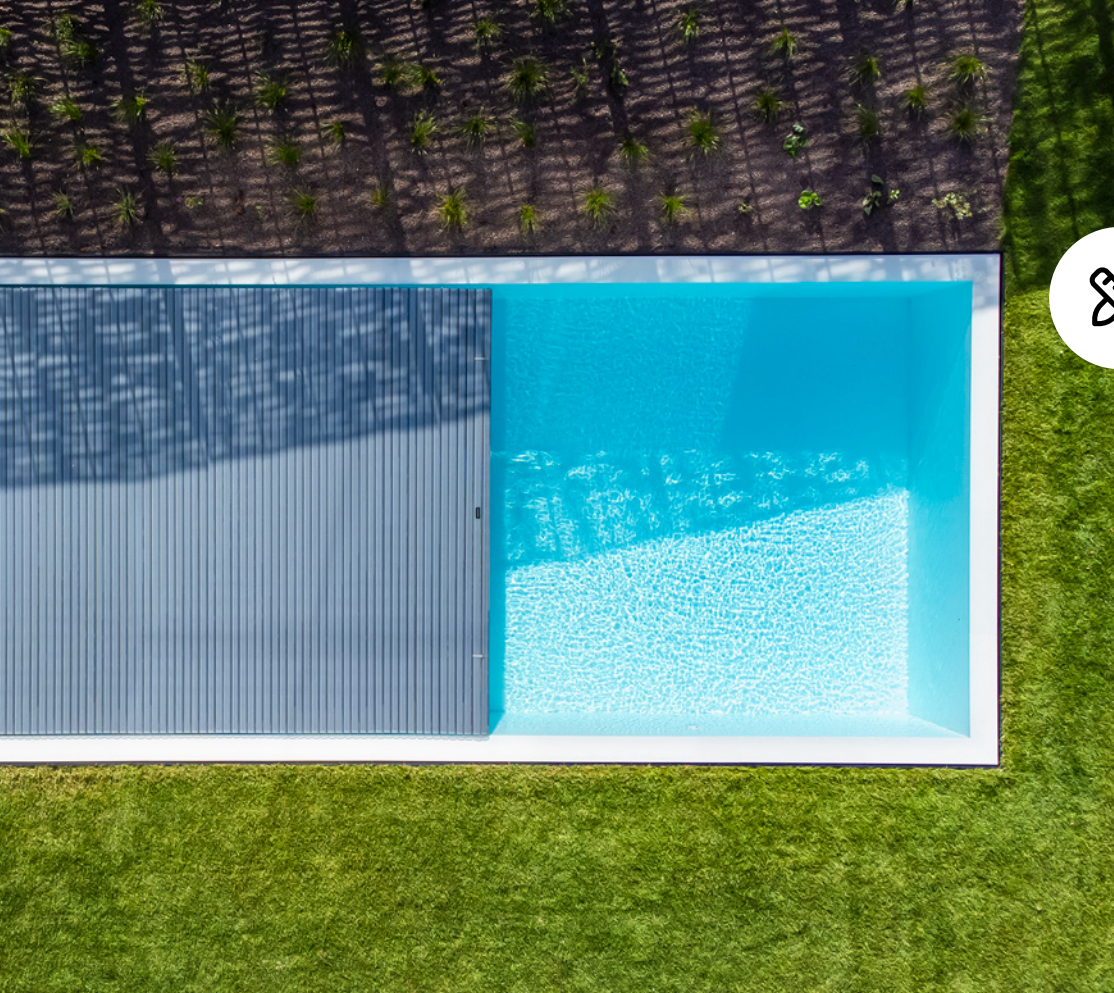

Your pool builder is our regular partner. Every day, he and his team work with our products. Together with them, we look for the ideal cover for every project that perfectly matches your wishes. An Aquadeck® is always custom-made: in shape, colour, material, dimensions and choice of in-ground or above-ground installation. With enthusiastic craftsmanship, we think along with you and your pool builder. With our smart MY AQUADECK® OrderTool, your cover is configured in detail and, after production, also perfectly installed by the pool builder. Aquadeck® ensures ease of installation, any necessary support and, of course, after-sales service. The result? Perfect customisation with a fast production time of 14 working days. That is the start of your guarantee of many years of swimming pleasure and maximum satisfaction.

Aquadeck® is part of the international Pollet Pool Group, a subsidiary of the Pollet Group. With 9 European distribution locations and two manufacturing companies (Aquadeck® in the Netherlands and Niveko in the Czech Republic), the Pollet Pool Group focuses on professional swimming pool builders. The parent Pollet Group is active in three areas: water treatment (Pollet Water Group), the swimming pool industry (Pollet Pool Group), and the medical sector (Pollet Medical Group). The parent group has more than 50 companies distributed over Europe, the Middle East and Africa.

The Aquadeck® advantages

An automatic pool cover serves several purposes: safety, functionality, energy savings, design, convenience... and intelligence. Every aspect is equally important for Aquadeck®. Just as you judge a book by its cover, the cover defines the aesthetics of your pool. And Aquadeck® goes even further. With an Aquadeck® pool cover, you can count on additional advantages alongside aesthetics:

Design

Close to be perfect! A closed Aquadeck® cover fits perfectly with your pool and looks wonderful. Aquadeck® creates an uncluttered and luxurious design. For every pool there is a matching Aquadeck® cover. The slats harmonise perfectly with your overall pool and garden aesthetics and are available in a variety of colours. We also offer a choice of two different materials: polyvinyl chloride (PVC) as standard, or polycarbonate (PC) for even higher quality and longer life.

Additional warranty on equipment and slats

When you choose Aquadeck®, you choose top quality. We're so confident of our quality that we offer longer warranty terms. We offer a 5-year warranty on both the equipment and slats (Polycarbonate and PVC).

Anti-algae

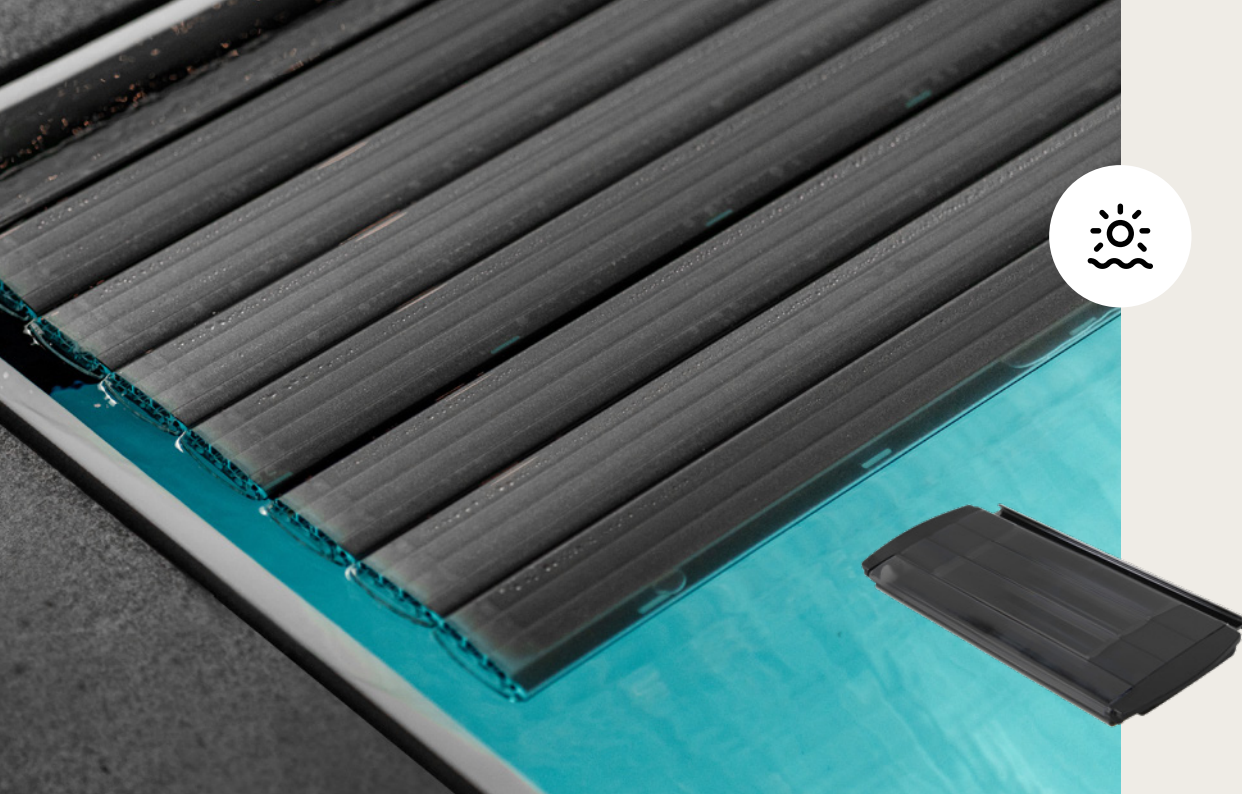

Our anti-algae slat is specially designed to prevent algae growth rather than hide it. Thanks to our clever slotted technology, every time the cover is opened or closed, a disinfecting water flow is directed through the slats. This flow loosens dirt and incipient algae growth from the coupling chamber and carries it away. This keeps the slats clean and prevents algae from attaching themselves. The result? A self-cleaning system that really makes a difference.

Tip: Open and close your cover regularly. This allows you to make optimal use of the cleaning effect and keeps your cover clean.

Safety

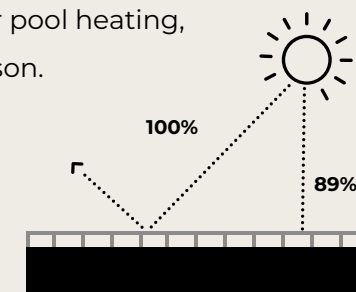

Safety in and around your pool is essential. Aquadeck® incorporates a variety of safety provisions in the slat system. The three-chamber compartment increases the buoyancy of the slats. Additional safety can be provided by a handle directly below the waterline. And you can always open and close an Aquadeck® cover both mechanically and electrically.

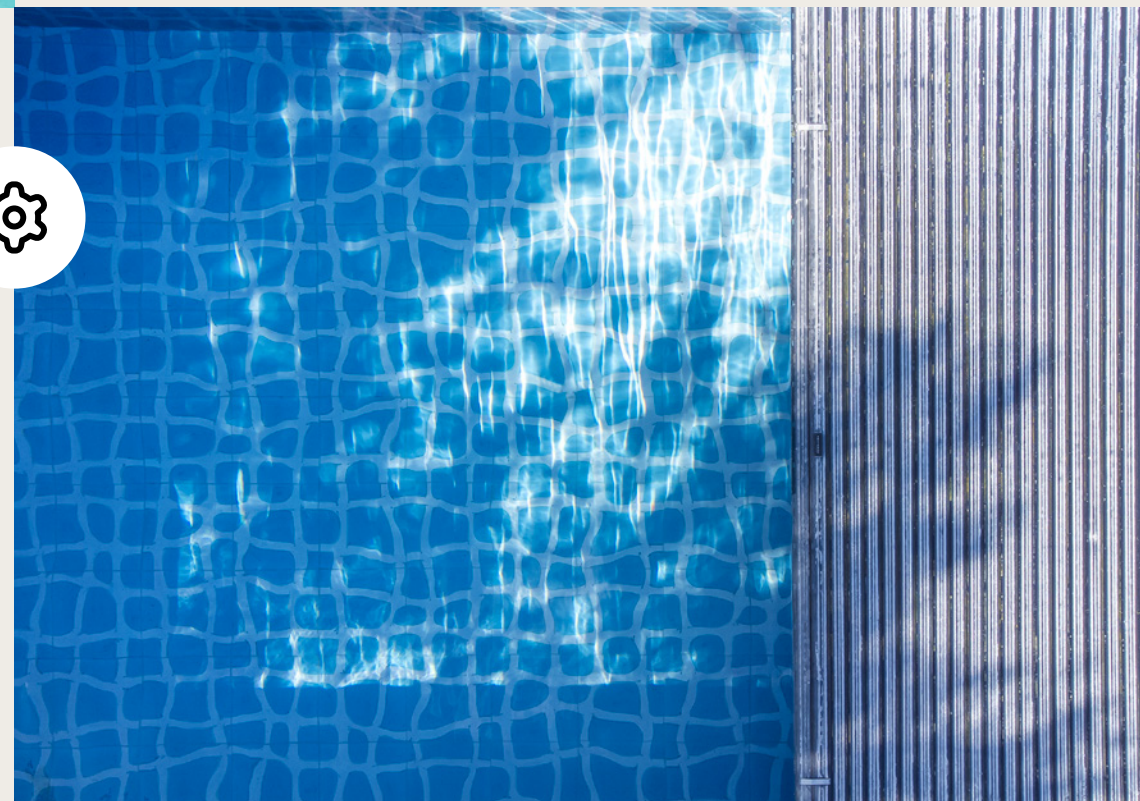

Solar slats

Aquadeck® offers a range of high-quality solar slats. Solar slats are highly popular. They have a transparent top surface and a heat resistant black undercoat to make optimal use of solar energy. This reduces energy consumption for pool heating, and solar slats prolong your pool season.

100% watertight

An Aquadeck® cover is an elegant complement to your swimming pool. Our production department uses an innovative automated sealing method. This minimises the humidity in the slat chambers, reducing condensation when the cover is in use. In addition, our slats are ultrasonically welded and coated with silicone to make them 100% watertight.

Create your cover story

An Aquadeck® cover stands for aesthetics. A great pool deserves an attractive cover. Your pool cover has its own personality, harmonises perfectly with your pool, and gives your garden extra allure. An entrancing picture. Close...to be perfect.

Aquadeck® wants to help you write your cover story, because every pool and every cover is unique. Aquadeck® slats are available in 10 colours (8 Polycarbonate and 2 PVC) and in 2 materials: PVC and Polycarbonate.

Polycarbonate

Polycarbonate slats are more impact resistant and last longer. Some of our PC slats have integrated solar chambers. These convert solar energy into heat, enabling considerable savings in energy consumption for your pool. Polycarbonate is hail resistant. PC slats are suitable for pool covers up to 7 metres wide.

- ～ Resistant to hail
- ～ Up to 7 meters
- ～ Highest quality
- ～ Long lifespan

Polycarbonate (PC) for even higher quality and longer life

PVC

PVC slats are more economical than PC. PVC slats are suitable for pools up to 7 metres wide. PVC is a durable material, but it is not resistant to hail.

Aquadeck®

A perfect fit.

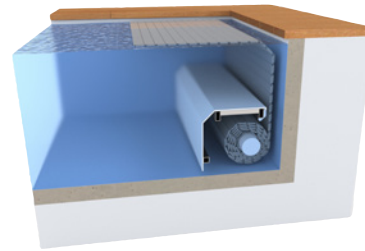

A perfect cover!

Swimming pools have changed a lot in the last 10 years. Aquadeck® has evolved with this trend and offers a variety of solutions for every pool. Aquadeck® offers complete, automatic cover systems for every type of pool. Would you like to install your cover in a niche? Or at the bottom of the pool? Or maybe you prefer an above-ground solution? We offer you smart solutions, easy to install and easy to use. Your cover is designed for daily use and absolute reliability.

A perfect fit. A perfect cover!

Aquadeck® offers complete, automatic cover systems for every type of pool. Would you like to install your cover in a recess? Or at the top or bottom of the pool? Or maybe you prefer an above-ground solution? We offer you smart solutions, easy to install and easy to use. Your cover is designed for daily use and absolute reliability. Aquadeck® covers are top-quality, stylish and high-tech products, and they enhance safety. We offer various installation options for perfect integration. Here are the seven options:

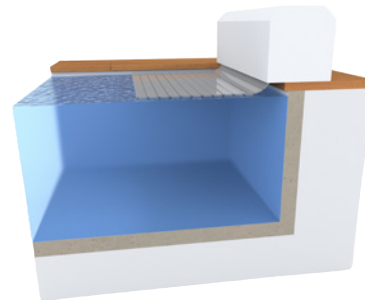

Visible or renovation

Corner cover

On the bottom with corner cover

The cover is installed in a special corner cover on the pool bottom. For enhanced safety, the cover clicks firmly into a pre-installed stainless steel structure. An opening in the corner cover prevents dirt accumulation.

Top-mount with cover

Above pool (top mount)

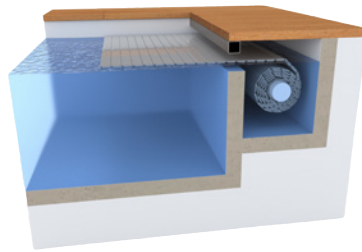

The customised surface-mounted systems integrate seamlessly into your pool environment and are the simplest solution for existing pools.

The Edge

THE EDGE is a stylish, above-ground cover system with optional LED lighting and remote control. Available in black, silver and umber grey. Suitable for swimming pools up to a maximum of 6 x 15 metres.

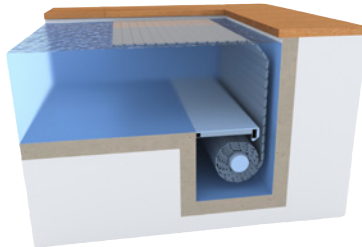

Discreet integration

Inserted beam

In a niche

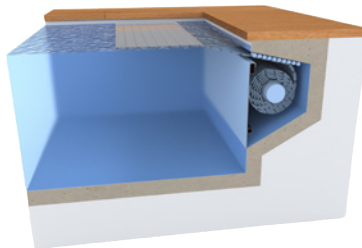

A niche is provided at the end of the pool. The cover is installed neatly concealed in the niche, and pool water flows through the niche to keep it clean. This arrangement allows you to use the full length of the pool.

Protective plate

In the bottom

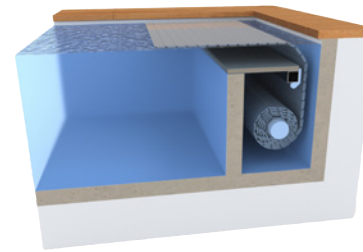

This construction is installed in the floor of the pool. The slats rise through a slot in the bottom. This construction allows you to use the full length of the pool.

Fixed clip

In the wall

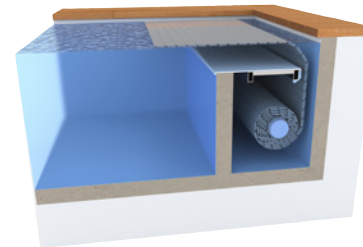

Here the cover is concealed in the wall. The niche in the wall is covered by a PVC protective plate. An opening below the PVC-plate allows dirt to escape easily. This construction also allows you to benefit from the complete length of the pool.

Supported beam

Under water terrace

The cover construction is installed on the bottom of the pool. A partition wall is placed as well as a stainless steel insert beam. This is closed with tiles, so you can enjoy on a shallow terrace and is ideal for the smaller children or for relaxing. The cover rises behind the inserted beam.

Lounger

Lounger

The cover is mounted at the bottom of the pool and placed behind a separation wall. The separation is finished with a special PVC lounger plate that clicks into a pre-mounted stainless steel construction. In this way you can enjoy a shallow terrace, ideal for children or as a relaxation area.
